

Planet Balloon Origami

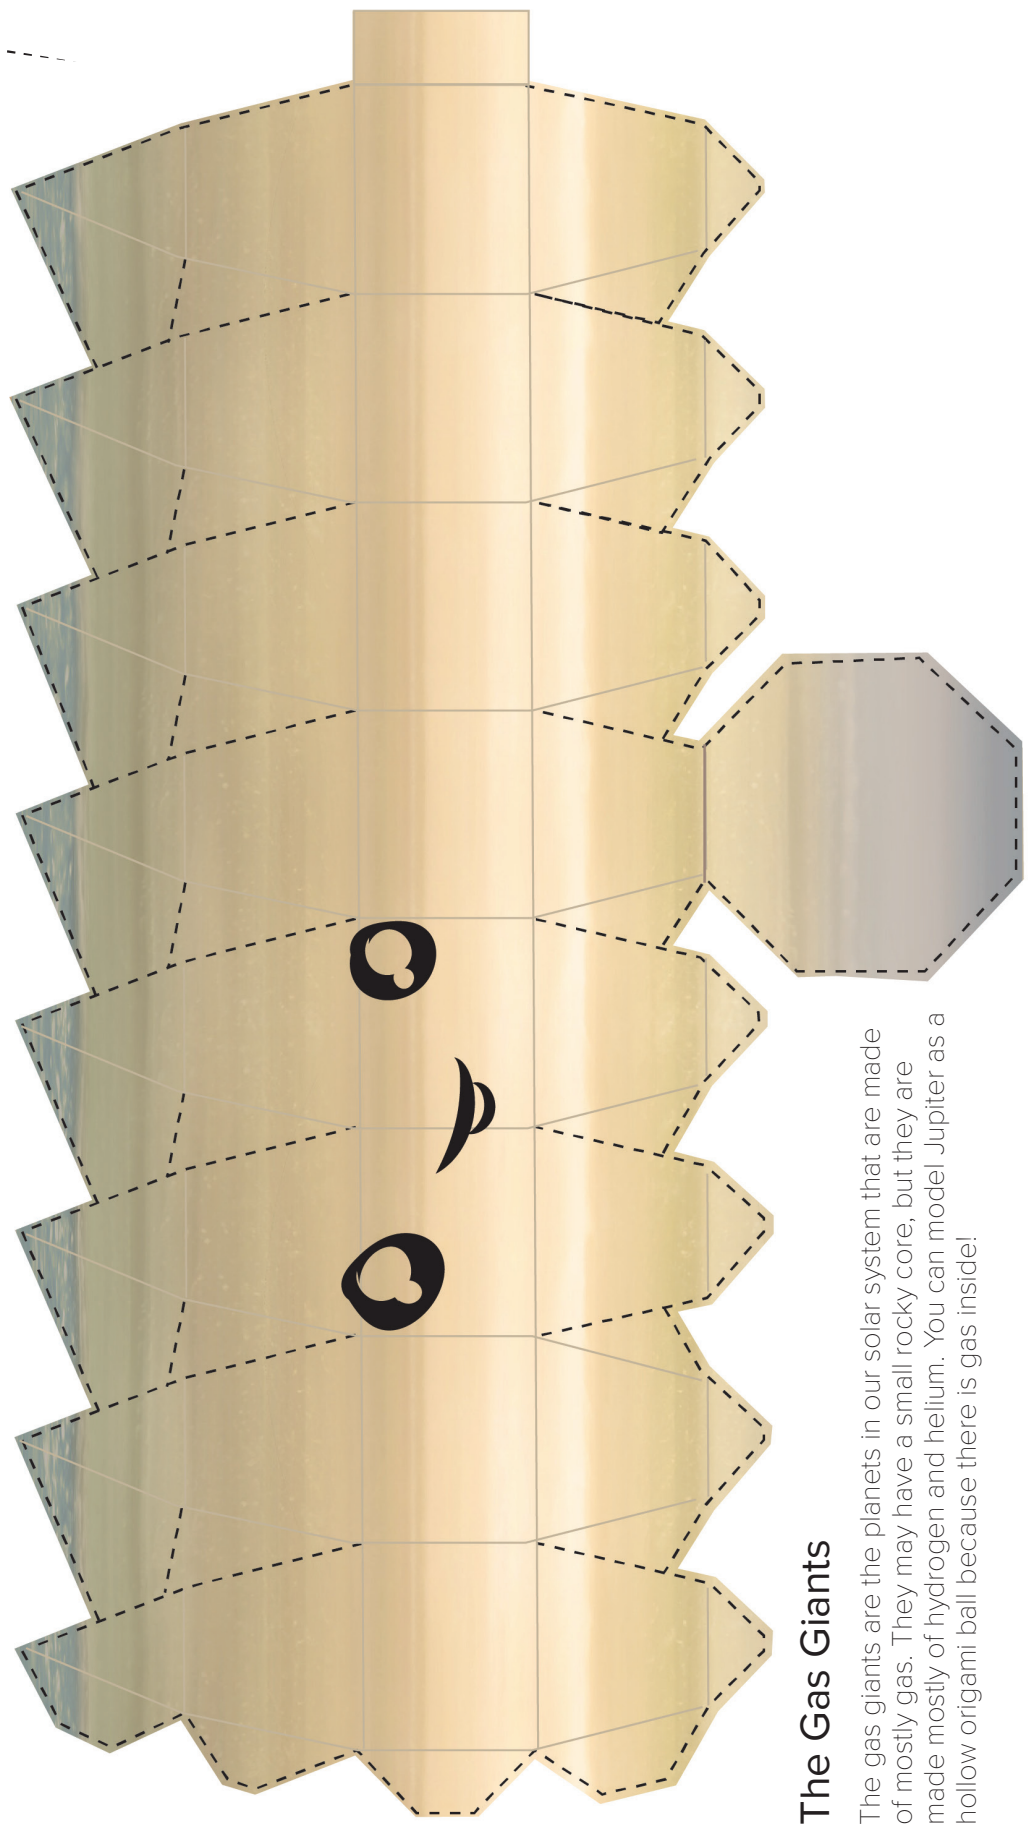

STEMTaught![®]

Saturn

Planet Facts:

- Diameter: 72,367 miles
- Distance from Sun: 888.2 million miles
- Length of day: 10 hours 42 minutes
- Orbital period: 29.4 Earth years
- Gravity: 0.91 times Earth's gravity

The Gas Giants

The gas giants are the planets in our solar system that are made of mostly gas. They may have a small rocky core, but they are made mostly of hydrogen and helium. You can model Jupiter as a hollow origami ball because there is gas inside!
