

## Planet Balloon Origami

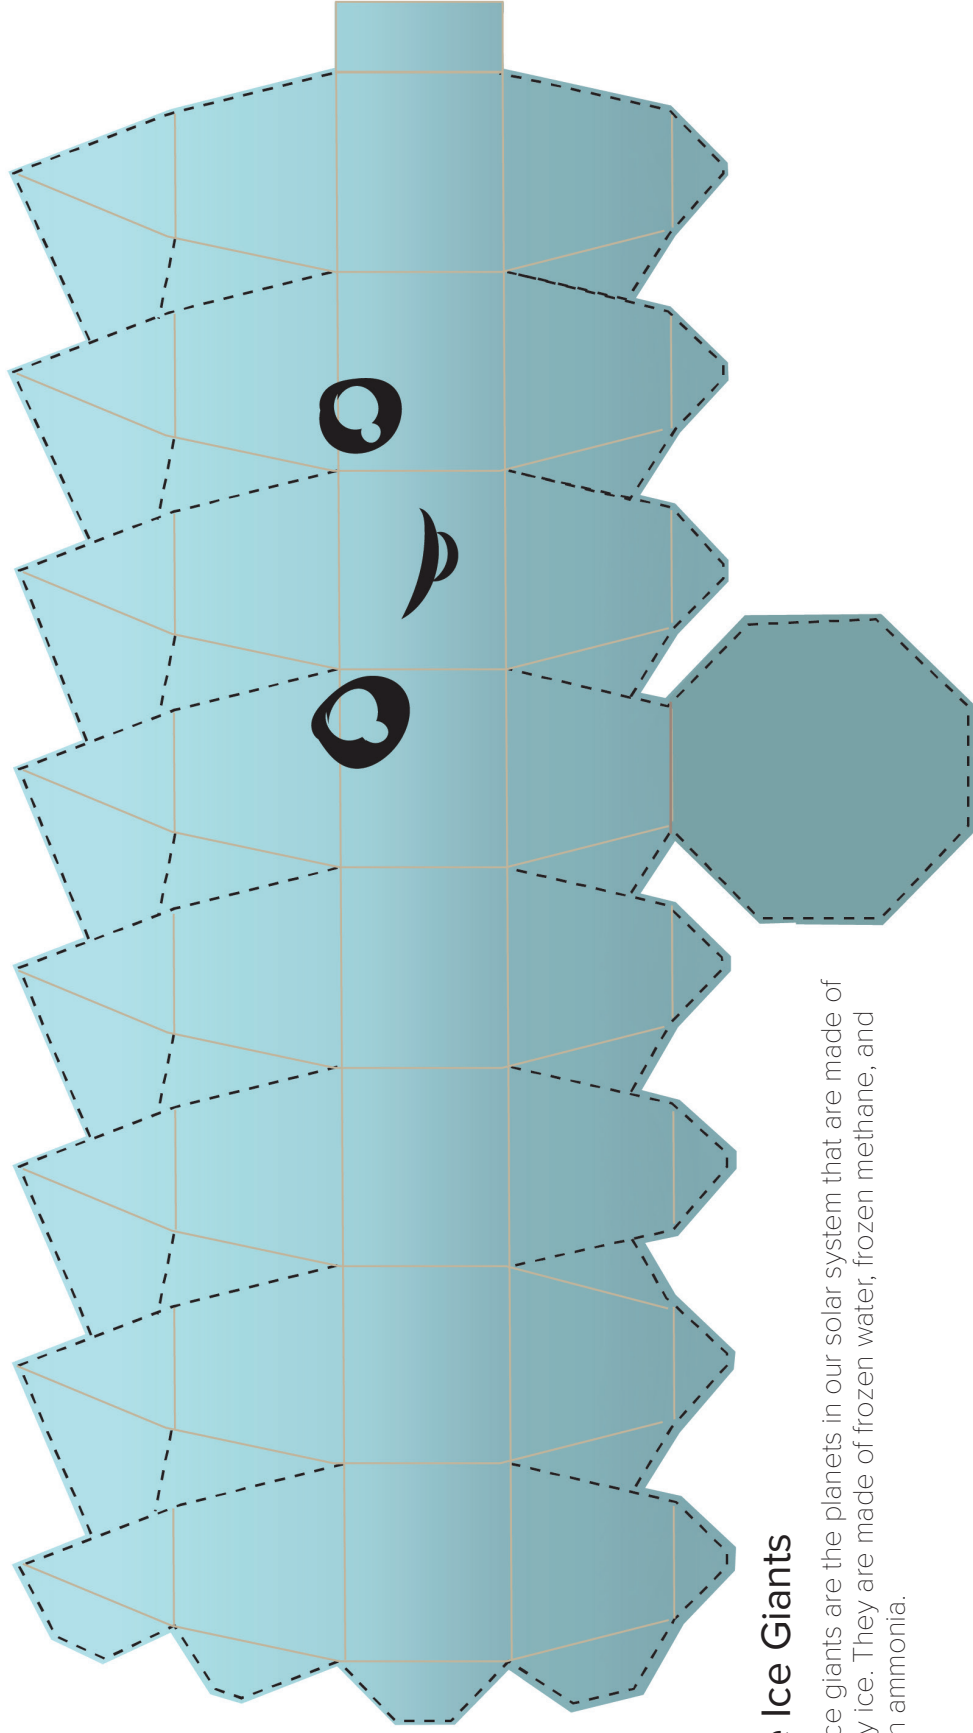

STEMTaught!<sup>®</sup>

## Uranus

### Planet Facts:

- Diameter: 31,518 miles
- Distance from Sun: 1.784 billion miles
- Length of day: 17 hours 14 minutes
- Orbital period: 84 years
- Gravity: 0.9 times Earth's gravity

## The Ice Giants

The ice giants are the planets in our solar system that are made of mostly ice. They are made of frozen water, frozen methane, and frozen ammonia.
