

Coyote

Lightning!
Your carbon burns into the atmosphere. Place ball in the center of the circle. Any plant gets your carbon.

Eaten!
You are eaten by another Coyote, but your remains are broken down by Beetle. Pass the ball and die to Beetle.

Breathe Out
You exhale carbon dioxide. Your carbon is used by any plant. You choose! Toss the ball and pass the die.

Die Naturally
You die of old age. Beetle breaks you down and eats your carbon. Toss the ball and pass the die to Beetle.

Blueberry Shrub

Lightning!
Your carbon burns into the atmosphere. Place ball in the center of the circle. Any plant gets your carbon.

Eaten!
You are eaten by Rabbit or Coyote. You choose! They consume your carbon. Pass the ball and the die.

Breathe Out
You do not pass along carbon when you exhale! Instead say "OXYGEN" and all the Animals say "THANK YOU" Roll the die again.

Die Naturally
You dry out and can't grow anymore. Beetle breaks you down and eats your carbon. Toss the ball and pass the die to Beetle.

Can you explain it?

How can carbon move within an ecosystem?
